

# CERTIFICATE OF CALIBRATION

Instrument Name:

Instrument Manufacturer: **General Photonics**

Model Number:

Serial Number:

Calibrated By:

Certificate Number:

Date of Calibration:

Date of next Calibration:

Ambient Temperature:

Relative Humidity:

## Standards Used to Calibrate Equipment:

Asset ID	Equipment Description	Model	Serial	Manufacturer	Cal. Due	Traceability #
20270	Precision Fiber Optic Source (ASE 1550nm)	MPS-8033	80331488	ILX Lightwave	5/3/2022	CC-80331488B
20087	Optical Attenuator	8156A	3328G01582	Hewlett Packard	7/16/2021	551220083715395
20091	Optical Power Meter	8153A	2946G09401	Hewlett Packard	1/4/2022	551220084012497

## Procedure Used in this Event:

Procedure Name	Description
C-150-01	POS-20X Calibration Procedure

## Test Standards:

*This document is to certify that the above product was calibrated in accordance with applicable General Photonics Corporation Procedures of Calibration. General Photonics Corporation operates under Management Procedures and Standards that are compliant with relevant clauses of ISO 9001 and designed to assure that the above mentioned product meets or exceeds its design specifications. Calibration is valid until the date of next calibration specified above.*

*General Photonics Corporation also guarantees that traceability is maintained throughout the calibration and that the calibration of this product is traceable to standards maintained by the National Institute of Standards and Technology.*

Certified By: \_\_\_\_\_  
Quality Engineer

This certificate of calibration shall not be reproduced, except in full, without the written approval of General Photonics Corporation. For comments or questions, please contact General Photonics Corporation Technical Support Staff.
